"State Watch" and "Indeterminate" Plant Species in NH (July 2010)

A revised state list of Threatened and Endangered plant species was submitted for adoption into rule in July, 2010. In order to determine what species are rare in NH, many candidate species were assessed. During this process, revisions were made to two categories (State Watch and Indeterminate) that were first developed in 2005 for species that are either uncommon but not rare enough to be listed at this time, or whose rarity status is uncertain. These categories have no legal standing, but we anticipate that having them will increase surveyor documentation of these taxa, improve our understanding of their status in the state, and stimulate research on their taxonomy and other pertinent issues.

NHB is interested in field observations for the species listed below, to help inform future listing decisions. Detailed reports are appreciated but not needed: a brief description of what was observed and a map of the location would be sufficient. Reports can be mailed to the attention of Bill Nichols at the above address or e-mailed to bnichols@dred.state.nh.us.

Rare plant list category definitions:

State Watch (SW): Native plants vulnerable to becoming threatened based on having 21-100 natural occurrences in the state observed within the last 20 years, or plants that are, in the judgement of experts, vulnerable to becoming threatened due to other important rarity and endangerment considerations (population size and trends, area of occupancy, overall viability, geographic distribution, habitat rarity and integrity, and/or degree of protection).

Indeterminate (Ind): Indeterminate taxa are under review for listing as endangered, threatened, or watch, but their rarity, nativity, taxonomy, and/or nomenclature are not clearly understood.

Scientific Name	Common Name	Status
<i>Acalypha gracilens</i>	slender three-seeded mercury	Ind
<i>Agastache scrophulariifolia</i>	purple giant hyssop	Ind
<i>Agrostis mertensii</i>	boreal bentgrass	SW
<i>Allium tricoccum</i> var. <i>burdickii</i>	narrow-leaf wild leek	Ind
<i>Allium tricoccum</i> var. <i>tricoccum</i>	wild leek	SW
<i>Alopecurus aequalis</i>	short-awn foxtail	Ind
<i>Ambrosia trifida</i>	great ragweed	Ind
<i>Amelanchier intermedia</i>	intermediate shadbush	Ind
<i>Amelanchier nantucketensis</i>	Nantucket shadbush	Ind
<i>Amphicarpaea bracteata</i>	hog-peanut	Ind
<i>Anemone acutiloba</i>	acute-lobed hepatica	SW
<i>Angelica lucida</i>	seaside angelica	Ind
<i>Argentina egedii</i> ssp. <i>groenlandica</i>	coastal silverweed	SW
<i>Aristida basiramea</i>	branching needle grass	Ind
